Subject Index

A

aerobic–anaerobic transitions
  in helminths 349
AIDS
  leishmaniasis co-infection 160
amoebiasis 165ff
  subunit vaccines 166
Angiostrongylus cantonensis infection
  eosinophils in 231ff
anisakiasis
  costs 423
Anopheles gambiae
  mariner in 58ff
antibacterial peptides, inducible
  in insects 132ff
antigenetic diversity
  and *Plasmodium falciparum*
    transmission 456ff
  of surface glycoproteins 53ff
antisense DNA 92ff
antisense nucleic acid techniques 92ff
antisense RNA 95
antisense theory 92
Apis mellifera
  selection for varroatosis resistance
    236ff
Arabidopsis thaliana
  as model for plant–nematode
    interactions 426
Ascaris spp
  energy metabolism 350
  germline determination 110ff
  proteinase inhibitors in 308ff
avermectins
  mechanism of action 33ff
avian *see also* birds
avian filarioids
  ephemerality 33ff
  reproductive senescence 33ff
axenic culture
  African trypanosomes 80ff

B

Babesia bovis
  potential vaccine antigens, helper T
    cells in selection of 145ff
  protective immunity 145
bednets, impregnated
  in malaria 279ff
bee, honey *see Apis mellifera*
beef
  as source of trichinellosis 434 (L)
birds
  parasitic infections 3ff
blackflies
  salivary vasodilators 431
Blastocystis hominis
  taxonomic status 64 (L)
blood monocytes
  in leishmaniasis 220ff
Borrelia burgdorferi
  macrophages and 154ff
Brazil
  leishmaniasis in 37ff, 329ff
Bulinus–Schistosoma interactions
  species specificity 69ff

C

Caenorhabditis elegans
  genome project 415
  germline determination 110ff
  mRNA expression in *Xenopus* oocytes
    33ff
cats
  Isospora infections 218
cattle
  gastrointestinal nematodes,
    chemoprophylaxis and immunity
    129ff
  Theileria spp
    taxonomy 31ff
  trichomoniasis 103ff
    reproductive tract immunity
    104
  trypanosomiasis
    congopain role 360ff
$CD4^+$ T cells
  interleukin 12 and 190ff
$CD8^+$ T cells
  $CD8^+$ to $CD8^-$ switch 313
  interactions with coccidia 10ff
  lymphokines and 12ff
  Th2-like protective role 313ff
cdc2-related protein kinases
  in trypanosomatid cell cycle control
    253ff
cecropins 133
cell lineage determination 110ff
cellular immune response
  in *Pneumocystis carinii* infection
    229ff
cerebrospinal fluid
  eosinophils in 231ff
Chagas disease 287ff
  autonomic nervous system in 287
  cardiopathy in 287
  congenital transmission 287
  diagnosis 175
chemokines
  in *Schistosoma mansoni* granuloma
    formation 322ff
  role in inflammation 322
chemoprophylaxis
  gastrointestinal nematodes in cattle
    129ff
chromosomes
  organization, karyotypic diversity
    and 114ff
  rearrangements in *Giardia lamblia*
    177ff
clonorchiasis 207
coccidia
  interactions with $CD8^+$ T cells 10ff
Cochliomyia hominivorax 119
  see also screwworm
coenzyme Q (CoQ; ubiquinone)
  biosynthesis 297
  as chemotherapeutic target 300
  functions 299
  homologues in parasitic protozoa
    296ff
cognitive function
  helminth infection affecting 14ff
compound exocytosis
  by eosinophils 276ff
concomitant immunity
  schistosome infections 377ff
congopain
  immune responses to 363
  role in bovine trypanosomiasis
    360ff
cyclin B RNA
  localizing to germline precursor cells
    112
cysteine proteases *see* congopain
cysticercosis
  costs of 421
  incidence 422
cytokines
  in cerebral malaria 410ff
  host-derived, cellular signalling by
    354
  interactions with parasites 353
  in Lyme disease 154
  in malaria 330
  in *Pneumocystis carinii* infection
    229
  in protozoa 352ff
  therapeutic value 1ff
  transgenic mice studies 258ff
cytolysis
  by *Entamoeba histolytica* 7ff

D

defence mechanisms
  molluscs 188ff
defensins
  insect 134
degranulation, cumulative
  by eosinophils 276ff
dispersion
  bias in geometric means 446ff
DNA
  antisense 92ff
  hypervariable sequence variation,
    MVR-PCR analysis 324ff
  kinetoplast 341ff, 344
  vaccines 453
DNA vector
  mariner as 58ff
Drosophila
  mariner in 58ff
drugs
  design 385ff, 389ff
  empirical contribution 387ff
  lead structures 389, 390
  rationale for discovery 385ff
  screening strategies 387

  island model 28ff
  landscape 29ff
educational achievement
  helminth infection affecting 14ff
electrophoresis
  pulsed field gradient gel (PFGE)
    225 (L)
ELISA (enzyme-linked
  immunoabsorbent assay)
    in filarial diagnosis 239ff
encephalitis, tick-borne
  ecology 157ff
  epidemiology 157ff
  and Lyme disease 157ff
endotoxins

effects 226
measurements 226
in murine trypanosomiasis 226ff, 434 (L)
nature of 226
energy generation
in helminths 346ff
energy metabolism
as target for intervention 351
Entamoeba histolytica
cytolysis 7ff
number of species 165
pathogenicity 44ff
phagocytosis and virulence 271ff
pore formation 7ff
virulence 44ff
eosinophils
in *Angiostrongylus cantonensis* infection 231ff
compound exocytosis by 276ff
cumulative degranulation by 276ff
IL-5 and 234
ephemerality
in avian filarioids 33ff
erythrocytes
Plasmodium-infected, nutrient trafficking in 393ff, 395ff, 399ff
see also parasitophorous duct
Europe
anthelmintic-resistant nematodes in 288ff
open borders increasing spread of parasites 89ff
exocytosis, compound
by eosinophils 276ff

F

farm animals
Giardia infection in 436ff
Fasciola hepatica
energy metabolism 349
infection, costs 423
fascioliasis 208
filaria

genetic elements, transposable *see* transposable elements
genetic manipulation 58ff
geometric means
bias in 446ff
germline determination 110ff
Giardia lamblia
chromosome rearrangements 177ff
giardiasis
costs 423
in farm animals 436ff
glucose-6-phosphate dehydrogenase (G6PD)
malaria and 251ff, 262 (L)
glutathione *S*-transferase
in *Schistosoma* 149ff
glycine-rich peptides
in insects 136
glycoconjugates 455
glycoinositolphospholipids
in *Leishmania* 455
glycoproteins
P, *see* P-glycoproteins
surface, *see* surface proteins
glycosyl phosphatidylinositol (GPI) anchor 48ff
genes involved 141
structure 139
synthesis 139ff
GM-CSF *see* granulocyte–macrophage colony-stimulating factor
GPI *see* glycosyl phosphatidylinositol
GRA proteins
in *Toxoplasma gondii* 293ff
granulocyte–macrophage colony stimulating factor (GM-CSF)
in leishmaniasis 222
in transgenic mice 260

H

haemaphysaline ticks
transmitting *Theileria* parasites 32
haemoglobinuria
paroxysmal nocturnal 142
heat-shock proteins
conservation in *Trypanosoma cruzi* 172ff
helicase, RNA
germline-specific 110ff
helminths
adult parasites in host 348
aerobic–anaerobic transition mechanisms 349
control 130, 131
energy generation in 346ff
free-living stages 347
infection affecting cognitive function 14ff
larval stages in host 347
hemoglobinuria *see* haemoglobinuria
herbal therapy
leishmaniasis 65ff
HIV infection
immunological control 265
Leishmania infantum and 264
honeybee *see Apis mellifera*
host–parasite interactions
variability 98ff

I

Ichthyophthirius multifiliis
life cycle 364
localized cellular responses to 364ff
immune regulatory mechanisms 267
immune response
cellular, in *Pneumocystis carinii* infection 229ff
stage-specific 487
immunity
acquired, modelling 197

tissue cyst formation, *in vitro* model 281ff
toxoplasmosis, congenital
costs of 419
trans-sialidases
in trypanosome insect-vector stages 170ff, 180 (L)
transgenesis
malaria control by 370ff, 374ff, 376
transposable elements
mariner 58ff
trematodes
food-borne 207ff
Triatoma infestans
eradication 287
triatomines
salivary vasodilators 431
trichinellosis 44ff
beef as source of 434 (L)
control 45
costs of 422
epidemiology 45
immunology 44ff
treatment 45
trichomonads
lipophosphoglycan-like molecules in 152ff
trichomoniasis
bovine 103ff
Tritrichomonas foetus
adherence antigen 105
antibody isotypes 104

immune response evasion 105
protective antigens 104
vaccination strategies 103ff
Trypanosoma brucei
axenic cultivation 80ff, 81
bloodstream forms, invariant surface proteins 53ff
cell cycle control 473
cell division 473ff
cell surface ultrastructure 55
differentiation 473ff
life cycle 80, 474
receptors 53ff
regulation of procyclin expression in 442ff
transporters 53ff
trans-sialidases in insect-vector stages 170ff, 180 (L)
Trypanosoma congolense
axenic culture system 82
Trypanosoma cruzi 249
energy sources 107
heat-shock protein conservation 172ff
intermediary metabolism 107ff
PEP metabolic branch point 108
trans-sialidases in insert-vector stages 170ff, 180 (L)
Trypanosoma vivax
axenic culture system 82
trypanosomatids
cell cycle control 253ff
kinetoplast DNA assembly 341ff
pathogenicity on insects 463ff
plant microtubule inhibitors against 448ff
trypanosomes 85ff
cell division 86
cellular signalling 86
control measures 85
genetic manipulation 85
host–parasite interactions 86
nutrient uptake 86
variant surface glycoprotein 267ff
trypanosomiasis
bovine, congopain role 360ff
murine, endotoxins in 226ff, 434 (L)
vaccine prospects 57
tubulins
microtubule inhibitors against trypanosomatids 448ff
tumour necrosis factor
transgenic mice 261

U

ubiquinone *see* coenzyme Q

V

vaccines
development, $CD8^+$ T cells in 13
drugs and 402ff, 404ff, 406ff
malaria 401, 406
nucleic acid 453ff
schistosomiasis 407
strategies against *Tritrichomonas foetus* 103ff
trypanosomiasis 57
variability
in host–parasite interactions 98ff, 99
karyotypic hypervariability 179
variant surface glycoprotein, trypanosome
T-cell response to 267ff
varroatosis
selection for resistance in honeybees 236ff
vasodilators, salivary *see* salivary vasodilators
vector-borne disease
natural versus laboratory studies 458ff
vector competence
molecular marker analysis 336ff
as quantitative trait 337
vectors
genetic manipulation in malaria control 370ff
Vietnam
parasitology in 247ff
virulence
pathogenicity and 44ff, 263 (L)
viruses, RNA
in protozoa 126

X

Xenopus oocytes
Caenorhabditis elegans mRNA expression in 33ff

Z

zoo animals
parasitic infections 357 (L)
zoonitic parasites
economic losses due to 419ff

Back Issues of Elsevier Trends Journals

Back issues from 1993 and 1994 are available to our customers at the following rates. Please state which issue(s) and quantity you require, including the volume and number (or year and month).

Issues(s): _____

_____

_____

Please tick how many copies you would like below. Back issues are available in bulk at discounted rates – institutions/libraries must pay institutional rates.

Individual Rates

- ❑ Single copy £16.00/$25.00 each
- ❑ Five copies £68.00/$106.00 (includes 15% discount)
- ❑ Ten copies £120.00/$187.00 (includes 25% discount)

Institutional Rates

- ❑ Single copy £33.00/$52.00 each
- ❑ Five copies £140.00/$218.00 (includes 15% discount)
- ❑ Ten copies £248.00/$387.00 (includes 25% discount)

*Hardbound compendia of previous volumes are available to institutional subscribers. Please ask for further details.

PAYMENT METHOD:

- ❑ Personal cheque, Eurocheque, or money order made payable to **Elsevier**
- ❑ Credit card
  - ❑ Visa ❑ Mastercard ❑ American Express
